H.E.L.P.S. / *The Discovery Bible* Seminar:

Reading Scripture for all its worth!

This is a delightful, devotional adventure in peeling back tens of thousands of insights of the original (Hebrew-Greek) text. Participants gain key skills of a trained Bible translator – reading-assets for LIFE – without having to memorize a single Hebrew or Greek word. They discover how to immediately open "often unread meaning-layers" that easily get lost in translation – reading the sacred originals through Hebrew and Greek eyes without ever having to even learn the Hebrew or Greek alphabets.

Using actual biblical texts as the textbook, *The Discovery Bible* software launches a next-step reading experience leveraged for deeper skills in: hermeneutics (interpretation), exegesis (leading out original-language insights), preaching, teaching, and daily Bible reading.

On major levels, this computer-assisted, interactive approach saves participants \$10,000 in seminary tuition fees (six semesters of OT Hebrew and NT Greek) and MORE. Users learn to routinely study the Bible *directly* from the sacred original text – catching-and-applying the spellbinding ways Scripture builds powerful sentences, communicating God's message through:

- emphasis
- word-colors
- action-pictures generated by OT verb stems/aspects and NT verb tenses/aspects
- other literary devices

See for yourself what a difference this makes for lifetime Bible reading-comprehension...leading out its treasure-trove of multi-nuanced meanings which has never been easier!
